

Programmer/SW Developer (Junior/Senior)

Position Description

We are looking for new members of our programming team (both juniors and seniors), who will become responsible for the design of our application software, as well as for ongoing maintenance, enhancements, and related issues resolution. We require creative problem-solving skills and the ability to work independently, as well as in close collaboration with other members of our international teams.

Current projects/teams that we are looking for developers on are:

- > Web developer – frontend/backend customizations and enhancements
- > Development of web based rendering engine – frontend and middle-layer
- > WPF / Windows Forms desktop application development focused on UI
- > Mobile Platform Development

Initial Training

- > As a new team member, you will be provided with extensive training on our applications and programming languages, databases and technologies that we utilize.
- > After the initial training, you will learn about our ERP application, programming language Progress, and individual procedures. You will be assigned to individual teams based on the ongoing projects.
- > Each new team member is partnered with a senior team member, who assists him in broadening his programming skills and experience.
- > At the beginning, you will work on simpler tasks and product enhancements. As your knowledge of our software grows, you will work on more complex projects.

The members of our programming team work on projects focused on developing business logic and user interface of client, web and mobile applications. Depending on the type of the project, they utilize various technologies (see the section below).

Job Requirements

- > Bachelor's Degree (min.) in programming, IT
- > English at communication level (verbal and written)
- > Self-reliance, self-motivation, a team player, accuracy, willingness to learn new things (openness to new experience and technologies)
- > Prior experience with database programming or any of the following programming language/technology is a definite plus:
 - > SQL Server and Progress
 - > Microsoft .Net (C# and VB.Net) – WPF, Winforms
 - > Microsoft Azure, Windows services
 - > ASP.NET (Core and MVC), WebAPI, Entity Framework, IIS, Windows Server
 - > Javascript HTML5
 - > iOS/Objective-C/Swift
 - > Android/Java/SQLite

Start Date: Upon agreement

We Offer

- > Full-time job employment contract for indefinite period.
- > Work in an international environment with pleasant atmosphere in modern office in Brno.
- > Extensive training for new employees, usage of English language on a daily basis.
- > Opportunity for career and professional growth, depending on your work performance.
- > Wide range of benefits (meal vouchers, cafeteria system, Multisport card, English or Czech lessons within working hours, partly flexible working hours, home office possibility, extra week of vacation after 2 years by company, 4 sick days per year, etc.).
- > Refreshments and game room at workplace, team buildings.
