

## International Territorial Studies

- International Development Studies
- Economic Development of Tropics and Subtropics

The aim of these study programmes is to prepare graduates of International Development Studies to work at the national or international organizations where complex knowledge or understanding of the problems of developing countries is required, especially issues of economic, environmental, social, political and cultural issues.

The programme starts in September – the winter semester of each academic year.

After successful completion of any of the Bachelor study programmes, students can continue to pursue their Masters degree in the same programmes. The accreditation for the MSc. Study programmes will be ready in 2011.
