**CHARAKTER PRÁCE:** aplikační

**HODNOCENÍ PRÁCE:** (vždy uveďte slovní komentář)

## 1. SPLNĚNÍ POŽADAVKŮ ZADÁNÍ:

The author was able to fulfil the goals he had set without any doubt.

## 2. PRÁCE S ODBORNOU LITERATUROU:

Theoretical part of the thesis is built on very good literature review that covers the most important scientific works in the area. In practical part the arguments are supported by well chosen data.

## 3. OBSAHOVÁ ÚROVEŇ PRÁCE:

Compared with most of the diploma theses I have read in last few years, the text of Jiří Mičánek is outstanding. The logical structure of the text is very good, the author uses the right data and is able to analyze them with the use of quite advanced statistical methods for this type of thesis.

## 4. PŘÍNOS PRO PRAXI, ORIGINALITA:

The text is original with lot of an added value from the author himself. From my point of view, it is a nice addition to the discussion on resource curse.

## 5. PŘIMĚŘENOST ZÁVĚRŮ A DOPORUČENÍ:

The hypotheses in the text were chosen right and the author was able to work with them correctly throughout the text. From my point of view, the author comes to the right conclusions. I especially praise the author for working with the institutions-economic outcome link, as I myself incline to the stream of development economics within the new institutional economy stream of thought.

Overall, the recommendations are more than adequate for this type of text.

## 6. FORMÁLNÍ ÚROVEŇ PRÁCE:

I have no objections to the formal layout of the thesis.

## KONKRÉTNÍ DOTAZY A PŘIPOMÍNKY K PRÁCI:

I would recommend Jiří Mičánek to publish his findings in a form of an article in academic journal. I think that with a little bit of extra work on concentration of the data this text is very suitable for that.

**PRÁCI K OBHAJOBĚ:** doporučuji

**NÁVRH VÝSLEDNÉ KLASIFIKACE:** A
